FALL 1947

W. E. MARSHALL & CO. *Inc.*

ESTABLISHED 1902

**150 West Twenty Third Street
NEW YORK 11, N. Y.**

IN PRESENTING our 45th Annual Fall Bulb Catalog, we take great pleasure in calling the attention of our many clients to our superb list of varieties. Having made most satisfactory arrangements with our Dutch growers, it enables us to give you the full benefit, which should encourage the planting of more bulbs this fall.

It is—and ever will be—our policy to offer only such seeds, bulbs and plants as measure up to the high standard we have set for them. **QUALITY** and **SERVICE** have been integral factors in establishing and maintaining for us a leading place in the horticultural world.

It shall be our constant aim to more fully merit the excellent reputation we enjoy as an establishment where one will find "everything good for every good garden."

Planting Table for Beds of Bulbs

A circular bed 6 feet in diameter, with bulbs 6 inches apart, requires 110 bulbs; 5 inches apart, requires 160 bulbs; 4 inches apart, 300 bulbs.

Depth at Which Bulbs Should be Planted

Many of our customers are frequently puzzled to know the proper depth and distance apart at which bulbs should be planted. The accompanying diagram conveys the information much more clearly and briefly than we could describe it. The chart will bear careful study. Outdoor planting should be done early in the fall to secure healthy plants, vigorous foliage and beautiful flowers.

MARSHALL'S FRENCH ROMAN HYACINTHS

The flowers are delightfully fragrant, and each bulb will throw up three to four spikes. For forcing, three or four bulbs are generally planted in a pot. The Roman Hyacinths can be grown very successfully in bowls with fiber or pebbles for winter flowers.

Marshall's NARCISSI and DAFFODILS

King Alfred

Daffodils are an indispensable factor in the pageant of spring floral beauty, and whether grown as specimens in the garden borders or planted *au nature* in woodland or glade, each blossom seems a concentrated gleam of golden sunshine. Absolutely hardy, they increase in beauty and size year after year. Our list has been carefully compiled and contains all that is best in these splendid bulbs.

Paper-White Grandiflora. The best Narcissus for growing in water. The flowers are large, attractive in color, and intensely fragrant. Planted in bowls of pebbles and water they will bloom in from 3 to 6 weeks, depending on the season planted. Only the largest bulbs procurable should be used. Small bulbs are not recommended. Mammoth bulbs	1.65	12.00

DAFFODILS FOR NATURALIZING

There is no more enchanting picture in spring than a natural planting of Daffodils, so arranged in groups that the individuality of each species may be maintained. An irregular massing should be made where the grouping is dense in the center with a thinning out toward the edges like a summer cloud.

We have made most satisfactory arrangements with an extensive grower of Narcissus in the northwestern area of the State of Washington, a section renowned for growing sturdy Daffodils, to supply us with a quantity of bulbs of certain varieties that are most adaptable for naturalizing purposes.

Dutch Breeder Tulips

Breeder Tulips bloom at the same time as the Darwins and their immense blooms are held erect on long, strong stems. The colors of the Breeder are what modernists term as "art" or pastel shades, embracing rich tones of bronze, yellow and purple. For association with the brighter hued Darwins, they are unsurpassed.

MARSHALL'S SINGLE EARLY TULIPS

(April Flowering)

For outdoor planting, 4 inches to the bottom of the bulb is deep enough, and a distance of 5 to 6 inches between the bulbs is sufficient. They may be planted in October and November, before the ground freezes. For pot culture, a compost of two parts loam to one part light manure, with some sand intermixed, is suitable. From three to five bulbs, according to size, in a 5-inch pot, are very effective. The pot should be buried until the bulbs are well rooted.

LILY-OF-THE-VALLEY

For forcing, the pips are to be preferred, being grown under conditions tending to promote vigorous and early blooming. Twelve to eighteen pips may be planted in a 6-inch pot, with all the fibrous roots carefully preserved, and keeping the crowns above the soil.

LILY-OF-THE-VALLEY PIPS

From Cold Storage

We have in storage a large quantity of Dresden Pips for forcing at any season of the year.

Lily-of-the-Valley can be forced in about four weeks from cold storage pips. We cannot supply less than 100 pips.

Marshall's Matchless HARDY LILIES

Among the stateliest of all hardy plants, Lilies, during their respective flowering seasons, constitute the chief attraction in the hardy border. They prefer a well drained soil, and should remain undisturbed for years. In the autumn give the bulbs a heavy mulching of leaves; coarse manure or straw will prove highly beneficial.

Lilium Auratum

We have prepared the following list of Hardy Lily Bulbs for delivery in October and November, most suitable time for planting. If planted according to directions, should produce an abundance of bloom throughout the entire season commencing with *L. Tenuifolium* in May and finishing with *L. Philippinense Formosanum* in September, and if left alone will increase in beauty and numbers from year to year.

The month following the name of the Lily is the flowering time.

Marshall's Pot Grown STRAWBERRIES

For Summer and Fall Delivery

The best time to plant pot-grown Strawberries is during July until the early part of September. They have the great advantage over "layer" plants of producing a crop of the largest and finest berries the first season after planting. Further than this, they may be safely planted in the hottest and driest weather without serious check to growth, and may be planted where early Potatoes, Peas, or other early crops have been harvested.

Extra Early Varieties

- Early Jersey Giant.** The earliest variety, producing large fruit, with a rich, wild Strawberry flavor Per 100 \$12.00
- Premier.** Produces vast quantities of sizable attractive berries of excellent quality. 12.00
- Success.** An excellent variety with large, uniform berries of bright scarlet color... 12.00

Everbearing Varieties

- Brunes Marvel.** In our opinion it is the best everbearer that has ever come out. It flowers and fruits steadily from June until frost. The fruit is good size, well shaped and excellent quality 20.00
- Gem.** The new everbearing sensation, producing bright, sparkling red berries, uniformly large in size. They are solid red to the center, juicy, deliciously sweet and very free from acid. A winner in flavor, quality, size, beauty and yield. Does well on all soils Per 100 \$15.00

- Mastodon.** "The Wonder Berry." One of the largest, most delicious and heaviest yielding of the everbearing sorts Per 100 \$15.00

Medium Early Varieties

- Bun Special.** A very productive variety with large, luscious fruit Per 100 \$12.00
- Dorsett.** Large, bright red, firm berries of excellent quality. Introduced by the U. S. Department of Agriculture .. 12.00
- Fairfax.** The best of the medium early class. Fine large bright red berries of extra size. Another introduction of the U. S. Department of Agriculture Per 100 \$12.00
- Senator Dunlap.** A large cropper with firm berries of excellent flavor. Does well in almost any soil 12.00

Midseason Varieties

- Big Joe.** Large, firm berries in abundance. Equally attractive to the eye and palate Per 100 \$12.00
- Catskill.** A heavy yielder of excellent fruit, being very productive and of high quality 12.00
- Glen Mary.** Wonderfully high quality and great productivity are the qualities of this berry Per 100 \$12.00
- Royal Sovereign.** The flavor is rich and vinous. An excellent variety for forcing 12.00

Late Varieties

- Chesapeake.** This variety requires high culture upon clay loam. The berries are firm and bright crimson in color .. Per 100 \$12.00
- Gandy.** An old and popular variety. The texture is of the firmest and the color a bright flame 12.00
- Red Star.** A strong, healthy plant maker. Berries very large, attractive bright red when grown in moist soil and well mulched Per 100 \$12.00
- Starbright.** One of the finest of the "lates." A heavy yielder, strong foliage and stems holding the fruit well up; very healthy, and the quality is excellent 12.00

Marshall's **DUROGREEN** *Lawn Grass*

Marshall's Durogreen Lawn Grass Mixture produces a perfect as well as permanent lawn of luxuriant richness. It quickly forms a closely interwoven, firm and elastic turf ready for cutting in about six weeks from time of sowing. This is a scientifically blended mixture, containing only the highest grade of re-cleaned seeds.

Price: Lb., \$1.25

5 lbs., \$6.00

100 lbs., \$110.00

Marshall's **MATCHLESS** *Lawn Grass*

Marshall's Matchless Lawn Grass Mixture still maintains a high place in the esteem of those who desire an even, dense growth of permanent sward very early in the season. It is composed of only the best re-cleaned seeds, containing Kentucky Blue, Fancy Red Top, Fescue, Perennial Rye, and a small quantity of White Clover, all blended to warrant perfect results.

1 lb. will sow a plot 15 x 15 ft., 5 lbs. a plot 25 x 40 ft., (1000 sq. ft.), 200 lbs. 1 acre (43,560 sq. ft.).

Price: Lb., \$1.00

5 lbs., \$4.75

100 lbs., \$90.00

Marshall's **SHADY PLACE** *Lawn Grass*

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful grass. The grasses used in making this special mixture are only those adapted for growing in shade. It has been successfully used on some large operations where a greensward was desired on land partially shaded by old trees.

Price: Lb., \$1.30

5 lbs., \$6.25

100 lbs., \$115.00
